

CARLA CARGO

Bob Box brings your bulk material

Bob Box is a handy and flexible solution to transport your bulk material. This way you can bring your material and tools quickly and easily to your workplace. You can secure every material with the integrated airline rails and attach your toolboxes (e.g. Tanos, Festool, Makita) with the systainer adapters. Bob Box can be loaded very flexible and can also transport extra-large material, such as a ladder, by leaving out the rear wall. To protect your load from sun and rain you can add the practical cover from Fahrer Berlin.

Bob Box in detail

Operating instructions

The base plate of the Bob Box is mounted on a CARLA with the supplied screws. Apply threadlocker (not supplied) to the screws before.

Assemble the side parts of the box with the front part and the rear part with the help of the plugin pins and place them on the base plate of the CARLA.

Lock the box by closing the plugin pins in the base plate.
